

Directional Arrow Board FACT SHEET

Bartco Directional Arrow Board is highly visible, light weight, has low power consumption and structurally robust to last in highly exposed outdoor conditions.

Why Bartco Directional Arrow Board?

Our Arrow Board comprise of many LED's, which make up multiple light configurations. The sign incorporates low voltage cut out, dimming as well as light measurements to enable the sign to compensate its intensity according to the ambient light conditions.

Our Arrow Board is a Fully Solar Powered Portable Traffic Control Devices which is designed and manufactured in Australia from an ISO 9001:2000 certified manufacturing facility located in Australia.

Bartco Arrow Board Solutions;

Trailer mounted "C" Type Directional Arrow Board can be used for roadwork as well as construction areas where traffic needs to be diverted. They provide a safer work area for the workers as well as reducing traffic congestion.

Vehicle Mount Directional Arrow Board provide an obvious solution for convoys, crash-cushion (TMA) trucks and emergency repair crews. Vehicle-mount arrow board is available in "C" Type, with the same features as our trailer-mount model. They can be mounted on virtually any vehicle by the customer or by the customers preferred intallation provider.

The quality of materials and workmanship for the Bartco Directional Arrow Board provide superior durability, lower total cost of ownership, and a better return on investment.
